

Jsst (Pronounce: Just) is a music addict based from The Netherlands. Real name: Joost Haijtink

Involved with music from a very young age, he started listening to Electronic Music at the age of fourteen. After some while, he bought turn tables and learned to mix.

Around the year 2000, he moved to Amsterdam to study Econometrics. It's a mix of Economics and Mathematics. Two different disciplines are combined to create something new. It's a brilliant way to produce new stuff as it works for music as well. Always looking for new ways to make tracks or to mix tracks for a DJ set. This approach reflects Jsst.

While he was studying, he wanted to know more about music; he started to learn to play the guitar.

The positive experience from playing an instrument made him curious to learn to play the piano as well.

He started writing his own tracks on the acoustic instruments. In the end the Personal Computer won when he started producing Electronic Music. Driven by an inner motivation to create each day something new. He's a productive guy. His style is uncatchable, but catchy! Genre isn't a word in his vocabulary. It's about flavor, passion and quality.

Jsst has releases on Jsst Records, DLimited, Baroque Records, Lethal Dose Recordings, Distortus Music, Funk'n Deep Records, Different is Different Records & many more.

His tracks are played by the big guys like Umek, Richie Hawtin, Alex Bau & Dr. Motte to name a few.

And yeah, he's playing as well. He's doing some gigs, mainly in Amsterdam. But with his internet activity he's connecting with the world. In 2015 he played at the Amsterdam Dance

Event. He played in other clubs in The Netherlands as well.
